Nichole,

We were able to access both of the plants that were surrounded by water. I hope to get a more complete assessment of the facilities tomorrow and I will pass along the information.

Mike

If you get any updates on those systems that were underwater. Will you let me know so we can update those and take them off of our list.

Nichole,

Brian is correct and it was my error that left it off the original spreadsheet. Fort Bend 182 was never built. It was actually Fort Bend 188. The Engineer tried to correct this by changing the ownership of the plant to Fort Bend 182 in May. I have moved all the information from 182 to 188 and stated that 182 is not online which is correct.

Hey Mike,

I just spoke with Brian Bare about Fort Bend County MUD 188 WWTP and he said you'd be the one to contact. From what he said it sounded like the plant may not be up and running yet. Could you confirm that for me?

Rosenberg is flooded and might have some blower damage.

On Sep 2, 2017 11:31 AM, "Young, Nichole" <young.nichole@epa.gov> wrote:

I think I missed Rosenberg. Does this one have just fence damage or is it flooded?

The flooded plants are still running, the flood waters are just more than half way up the wall.

Missouri City is operated by Qual Valley Utility District. Not sure of the other one.

Thanks for all of your help.

As far as the plants that are flooded go, is it safe to assume those are online or offline? I know I have spoken to a few people that had plants underwater but were still reading online

And also would you happen to know the operators for Timber Forest and Missouri City?

Nichols,

Some of these had damage to the surrounding area but the facility ended up being ok. Hope I didn't read the original question wrong. See below for current assessment.

Thanks,

Mike

Mike,

For the WWTP's that have major and minor damage, can you give me a brief description of the damage and then also confirm if the damage has been repaired or not? You can just type the information in the email if that is easier for you. I've listed the facilities below.

Blue ridge - seems to be ok, area flooded
MUD 55 - seems to be ok, address flooded
MUD 162 - cannot assess, flooded
MUD 182 - cannot assess, area flooded
Foster Brisco - cannot assess, flooded
MUD 365 - lost blower and maybe electrical, still partially flooded
WCID 89 - cannot assess, flooded
Memorial MUD - flooded
North Territory - flooded
Nottingham Country - flooded
Sienna Plantation 2 - fence
Sienna Plantation 3 - fence
Sienna Plantation 4 - fence
Willow Point - well motor, replaced

Thanks again for your help,

Nichole,

I have completed the spreadsheet according to all the current knowledge I have on our facilities. You can follow up with me if you have any questions or wish to know the future status of these systems.

Thanks,
